Hearing Loss is one of the easiest hazards to protect against

You can begin to save your hearing today even if you have experienced some hearing loss by using:

Formable Foam Plugs

These are compressed in the fingers and then they gently expand when inserted in the ear.

Earmuffs

These hard plastic earcups are lined with sound absorbing foam or oil filled bags with an adjustable head band.

Plugs and Muffs are:

- Comfortable
- Simple
- Inexpensive
- Convenient
- Effective

It’s never too late to start!

Did you know that Auto Repair Workers are at high risk for occupational hearing loss?

MICHIGAN STATE UNIVERSITY
COLLEGE OF HUMAN MEDICINE

East Lansing, Michigan 48824
www.oem.msu.edu
The National Institute for Occupational Safety and Health (NIOSH) recommends the maximum noise level should be limited to 85 dB(A) for 8 hours of exposure. This is the same level at which the Occupational Safety and Health Administration (OSHA) requires a hearing conservation program.

Hearing gets worse as you get older but if you protect your hearing, you can delay hearing impairment until at least your 60’s. By the age of 25, auto repair workers who do not protect their hearing will have the hearing of a 60 year old who has had a quiet job or protected their hearing.

After you leave work, if your ears are ringing or sounds seem dull or flat, then you were exposed to damaging levels of noise.

Hearing loss can occur from a single, loud, explosive sound or from prolonged daily exposure to high levels of noise.

Most of the power tools common to auto repair and bodywork - disk sanders, impact wrenches, running engines, shopvacs, grinders, sandblasters, car horns, electric drills - create enough noise to cause hearing damage over time.

Hearing aids will not completely reverse hearing loss and will not stop the constant ringing in the ears caused by hearing loss.

**Become Aware of the Risks:**

dB(A) readings from a decibel meter for the following sources of damaging noise:

- **90 dB(A)** Impact Wrench
- **90 dB(A)** Disk Sander
- **90 dB(A)** Shopvac
- **85 dB(A)** Electric Drill
- **90 dB(A)** Auto Horn
- **190 dB(A)** Running Engine
- **110 dB(A)** Auto Horn
