

DISINFECTANT SAFETY

ALWAYS wear personal protective equipment.

ALWAYS read the label before using any product.

NEVER store disinfectants in food or beverage containers.

WARNING! Do not use bleach with other products. This may cause the release of dangerous gases.

What is a disinfectant?

Disinfectants are chemicals that are applied to non-living objects to kill microorganisms that live on the surface.

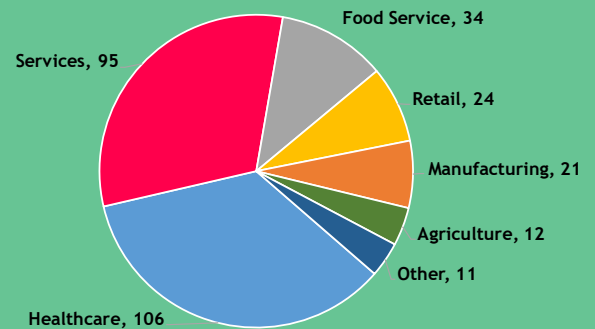

Common Disinfectant Agents in MI Workplace Exposures (2001-2016)

A Safe Workplace

Michigan employers are required to provide proper protective equipment and training on disinfectant use.

MI Workplace Exposures by Industry (2001-2016)

To file a workplace complaint, contact MIOSHA:
<https://w2.lara.state.mi.us/SafetyHealthHazards>
or call 800-866-4674

For injury or illness, call the Michigan Poison Control Hotline: 800-222-1222
